Projects

Food Delivery Web App

Full-stack application for food ordering and restaurant management using *Node.js, Next.js, MongoDB, Firebase Auth*.

- Enabled users to browse restaurants, menus, and place orders securely.
- Implemented real-time order notifications for restaurants.

Hospital Management System

Online platform for appointments, doctor dashboards, and patient records using *React, Node.js, MongoDB*.

- Synchronized real-time data between patients and doctors for effective interaction.

BlueColor App – Freelance Job Platform

Cross-platform mobile app connecting freelancers and clients with job postings, ratings, and chatting built using *Flutter, Firebase*.

- In-app job posting, user profiles with ratings, and instant chat features.

Cab Booking Website

Backend system managing authentication, cab availability, and pricing using *Node.js, Express.js, MongoDB, JWT*.

- Handled driver and customer authentication with secure route pricing algorithms.

Remote Freelance Work Tracker

Desktop and web-based app to track freelance work sessions featuring screenshots and dashboards using *MERN Stack, Electron.js*.

- Implemented timesheet tracking, screenshot logging, and task overview dashboard.

Achievements

- Achieved 3rd place in **ANVESHANA - National Level Hackathon 2024**, Atmiya University.
